Folio: poster guide for Shaz

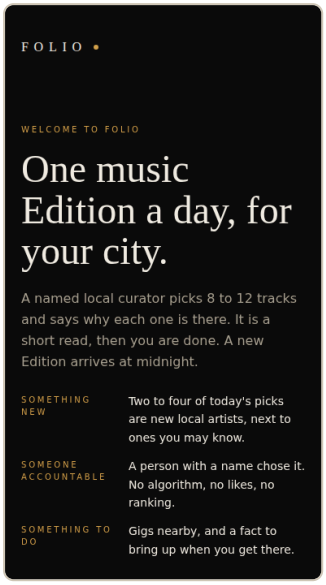

Team 11, DECO3500 Social and Mobile Computing. Written 14 Oct 2026 by Dylan's assistant from the course brief and the current build. Tradeshow is Week 12 (Tue 20 or Thu 22 Oct; day to be confirmed with the tutor).

1. What Folio is, in 20 seconds

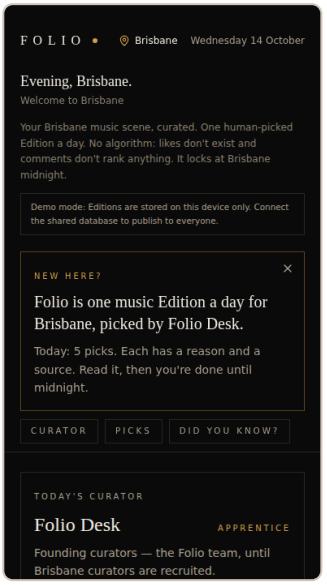

Folio gives each city one human-picked music Edition per day. A named local curator picks 8 to 12 tracks, says why each is there, and links a source. It locks at the city's midnight. No likes, no ranking, no algorithm. At least two picks are new local artists. Brisbane is live. Users are listeners, artists, curators (applied for, approved by the team) and the Folio team.

2. What the app looks like right now

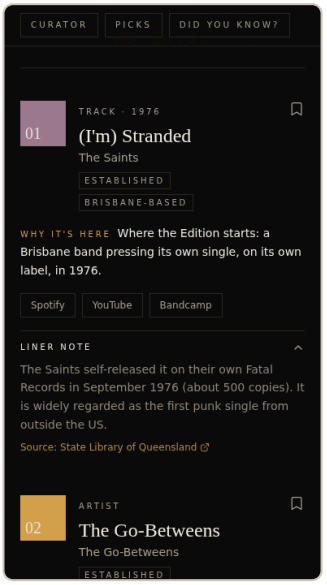

These are real screenshots from the current build (phone size). Dark ink background, cream text, saffron accent, serif headings. The old MOTIF navy-cyan-magenta look is gone; do not use it.

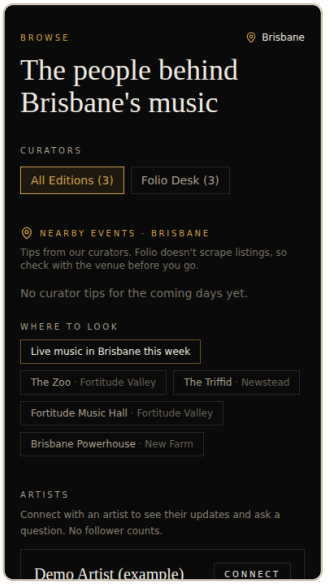

1. Welcome: what it is and why open it today

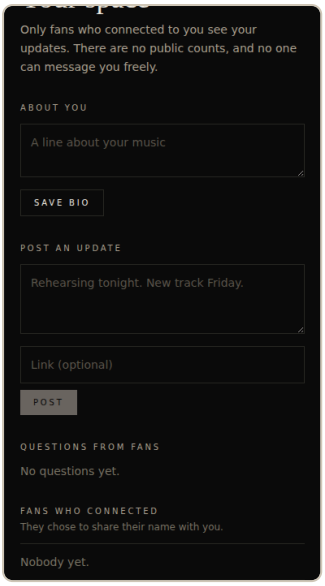

2. Today: the Edition, curator named

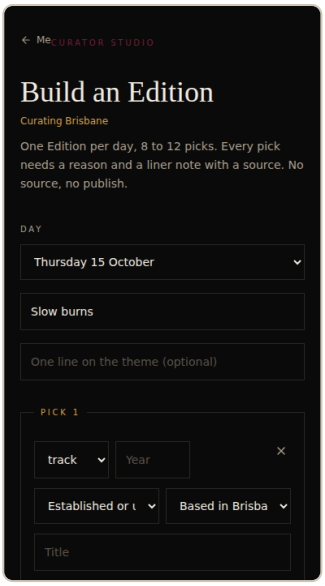

3. A Liner Note with a source

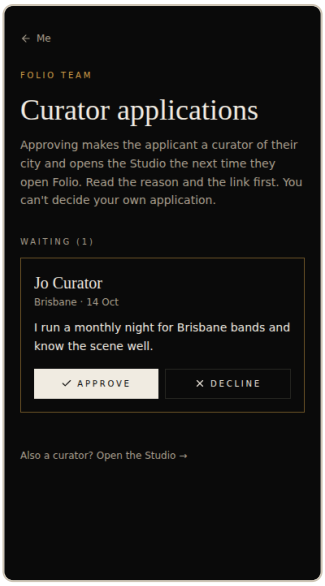

4. Browse: curators, Nearby, artists

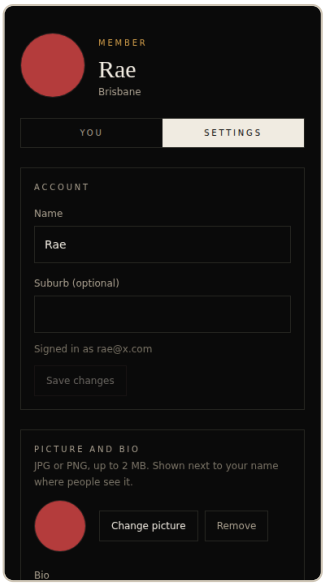

5. Artist space

6. Curator Studio checks the rules

7. Folio team approves curators

8. Settings and profile picture

Try it yourself, no password: **https://s4899427.github.io/Team_11_Folio/#/demo** (the sandbox opens every role). The live app is the same address without **#/demo**; choose *Join as a guest*.

3. The poster: format (from the brief)

- **A2, portrait (420 x 594 mm), a close-read conference poster** covering problem space, concept and process, pulling from our GitHub documentation.
- Plus a **2 to 3 minute pitch**; every member must be ready to pitch (script: *submission/08_Pitch_Poster_Demo/DEMO_SCRIPT_AND_PROF_QA.md*).
- Optional promo (video, website, brochure, social post) that lets the idea stand alone. Link it from the repo's main page.
- Assessed as: *a creative, engaging pitch and poster that clearly explain the project*. One of five equally weighted criteria.

Visual identity

Ink #0C0A09 Cream #F4EDE0 Saffron #D4A24E Burgundy #7C1F3A. Headings in a serif (Fraunces), body in Inter. Wordmark: FOLIO with a saffron dot. Suggested sizes at A2: title 110 to 140 pt; section headings 54 to 64 pt; body 26 to 32 pt; captions 20 pt. Fewer words, bigger images; a reader should get the point from 2 metres away, then read closer.

4. What goes on it, block by block

#	Block	What to put	Take it from
1	Title and tagline	"Folio. One music Edition a day, for your city." Team 11, names, course	README
2	Problem	Algorithms narrow taste; local artists get buried; nobody accountable. One strong anonymous quote with its code (R1-?)	05_Research_Evaluation/all-interviews-deidentified.md
3	The idea in one sentence + five rules	One Edition per city per day; 8 to 12 picks; every pick sourced; at least 2 new local artists; no likes, no ranking; locks at midnight	02_Product/MVP_SPEC.md
4	How it works (3 screenshots)	Today, a Liner Note, Browse with Nearby. Short captions	screenshots above
5	Who it is for	Four roles as four icons: listener, artist, curator, Folio team; one line each	02_Product/MVP_BY_ROLE.md
6	Social and mobile ideas (the theory)	Pick 3: the 3C model and awareness; visibility versus privacy (and why there are no counts); the location framework	03_Theory_SMC/SMC_CONCEPT_MAP.md

		(theme, nodes, trajectory). One diagram of a day in Folio	
7	Our process	A timeline: MOTIF concept, six interviews, Week 9 feedback, music pivot, Folio build, shared database, evaluation. Show an early sketch or the old poster next to the current screens: the change is the story	04_Design_Process/
8	What users told us	3 findings, each with "so we changed X". **Leave a box for evaluation results until sessions are run; do not invent**	05_Research_Evaluation/EVALUATION_RESULTS_TEMPLATE.md
9	Ethics	3 decisions: location never stored; fan names only to the artist they chose; curators applied for, not chosen. One line on the Ethical Disclaimer exercise	06_Ethics/
10	Real or simulated?	A small two-column box (honesty scores marks)	MVP_SPEC.md section 8
11	Try it	**Big QR code** to the live app; the short link; "Join as a guest"	Pranav makes the QR
12	Footer	Who did what in one line each; AI-use line ("Claude was used for ...; all decisions and research by the team"); acknowledgement of Country if the team confirms wording	10_Team/, 06_Ethics/AI_USE.md

5. Suggested layout (A2 portrait, three bands)

Top band (about 20%): title and tagline, one hero screenshot, QR code top right.
Middle (about 55%): left column problem, idea and rules; centre three phone screenshots in a row with captions; right column roles and the social-and-mobile concepts.
Bottom (about 25%): process timeline across the full width, then evaluation findings, ethics, real-versus-simulated, team and credits.

6. Do and do not

- **Do** show the product doing things: screenshots with callouts beat paragraphs.

- **Do** include one trade-off we accepted (for example no like counts, so no social proof) and why.
- **Do** use anonymous participant codes (R1-A to R1-F); never real names.
- **Do not** claim the app is validated, or say anything about evaluation results we do not have.
- **Do not** mention features that are not built (a gig verification queue, an AI link check).
- **Do not** use Indigenous artwork or patterns unless the team has permission and a credit line (see below).

7. A note on Aboriginal art

Brisbane is on Turrbal and Yuggera/Jagera Country. The app already carries an Acknowledgement of Country (draft). Adding artwork is not just a style choice: it needs permission from the artist or community, a credit, and a fair arrangement. We will **not** make "Aboriginal-style" patterns ourselves or use AI to imitate them. If the team wants artwork on the poster or in the app, the route is to contact an Aboriginal or Torres Strait Islander artist or the UQ unit that supports First Nations students and staff, ask, and credit. Until then, the safest strong choice is a clear Acknowledgement of Country line on the poster, reviewed by the right person.

8. What Shaz needs to decide or deliver

Item	Needed by
Poster draft v1 in Figma, Canva or PowerPoint, with blocks 1 to 7 and 9 to 12 filled	Fri 16 Oct (you are unavailable Mondays and Fridays, so aim for Thu 15 Oct)
Evaluation findings box filled after sessions S1 and S2	Sun 18 Oct
Print check: confirm print shop opening hours and lead time for A2 (we have not verified them)	start now
Pitch rehearsed aloud with a timer, 2 to 3 minutes	before the tradeshow

Questions go to Dylan. Everything referenced above is in the **submission/** folder of the repo.
