

MOTIF

A living wiki for world culture

Music . Fashion . Art . Food - discovered, streamed and remixed together

THE OPPORTUNITY

A living, wiki-style space for world culture: pick any tradition and see it holistically - the instruments, the fabric and dress, the food, the art, the stories - tied together, not scattered across five different searches. Streaming music and a lightweight remix feature called Drop sit alongside it, but the encyclopedic core is the point.

THE PROBLEM

20.7 hrs

AVG WEEKLY MUSIC
listening per person, globally

44%

OF SUBSCRIBERS
discover a new artist weekly

4%

OF MUSIC ENGAGEMENT
is live music - smallest slice

Source: IFPI Engaging with Music 2023 (43,000 respondents, 26 countries)

FROM OUR INTERVIEWS - THREE OF US, INDEPENDENTLY, SAME ANSWER

"I just want it to be more human focused. Algorithm has ruined the taste - no fun, no randomness to it."

- Aloysious, 28, India - interviewed by Dylan

"Just tell me what's happening near me that people I trust are into. Not what a machine thinks I'll click."

- Participant - interviewed by Pranav

"Everything feels very algorithm-driven. I'd like to discover things more naturally."

- Minahil, Resident Doctor - interviewed by Mohammad

PRIOR ATTEMPTS - AND WHERE THEY STOP

Spotify / Apple Music

Solo listening; social features are an afterthought

Wikipedia

Deep on facts, zero on lived culture or community voice

Instagram / TikTok

Where discovery happens, but ephemeral & unsearchable

Bandsintown / Songkick

Artist-follow only - useless for a culture you haven't met

OUR AUDIENCE - GROUNDED IN 6 REAL INTERVIEWS

Marushka

Pritesh

Minahil

Rayyan

Sully

Aloysious

VALUES

Authorship over their own taste. Community-curated over algorithmic.

WORKFLOWS

Screenshot, group chat, forget. Discovery dies in the camera roll.

SKILLS

Fluent across four apps at once; expert curators, no single tool.

PRIORITIES

Low effort daily, high effort for an occasion. Local beats broad.

PLAN OF WORK

WK 6

Finish interviews

Diary study out; concepts on paper

WK 7

Compare & decide

Test w/ 5 participants; lock concept

WK 8-9

IA & mid-fi

Clickable Figma prototype

WK 10-11

Build core

Real core loop, rest simulated

WK 12-13

Test & ship

Usability round, final docs

TEAM MOTIF

Dylan - Research synthesis & docs Pranav - Content & audience research
Mohammad - Technical build Paul - Media & assets
