FOLIO .

ONE CITY. ONE EDITION. EVERY DAY.

One music Edition a day, for your city.

A named local curator. 8–12 sourced picks. A fresh Edition at midnight.

WHY FOLIO

Four goals for how a city finds its music

01

A person, not an algorithm

A named curator chooses each Edition.

02

Put new local artists first

At least two new local artists in every Edition.

03

Make every pick accountable

Every pick has a reason and a linked source.

04

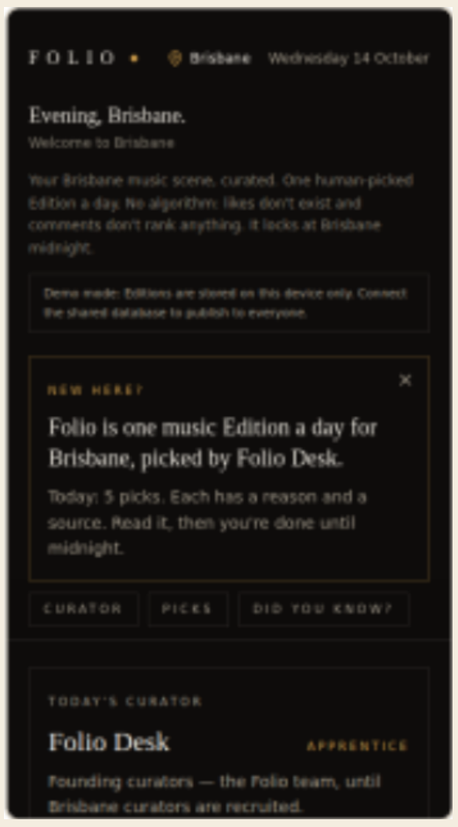

Keep listening calm

No likes, no ranking. A finite daily read.

THE APP, ROLE BY ROLE

Discover. Read. Connect. Curate.

Listeners find music · Artists share updates · Curators build Editions · The Folio team approves curators

LISTENER

Today

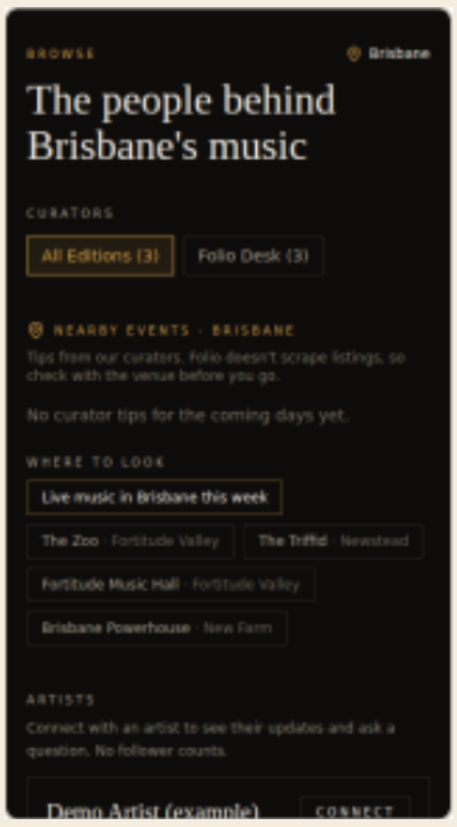

The Edition and its named curator.

LISTENER

Liner Note

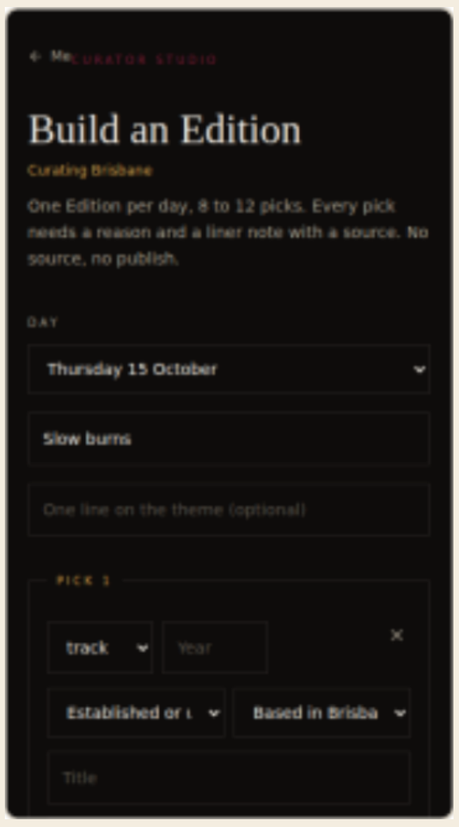

Why this pick is here, with a source.

LISTENER

Browse + Nearby

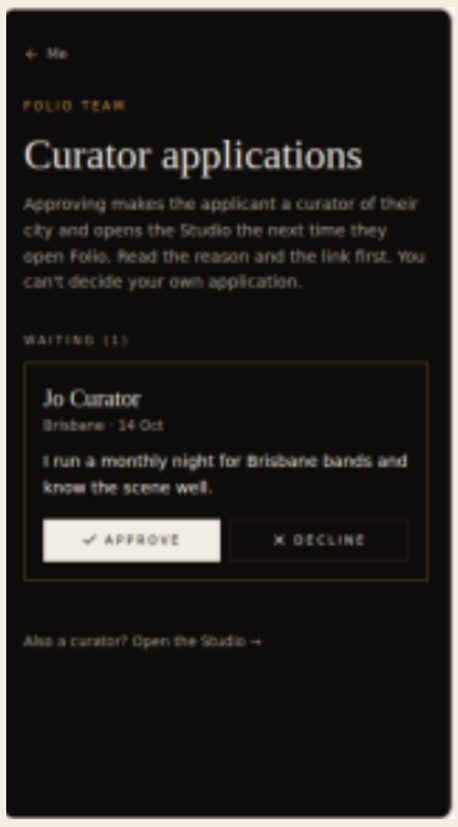

Discover curators, artists and local gigs.

CURATOR

Build an Edition

Add picks, reasons and sourced liner notes.

FOLIO TEAM

Approve curators

Read applications and their reasons.

SOCIAL + MOBILE IDEAS

The theory behind it

3C model + awareness
You always know who chose the music.

Visibility vs privacy
No public counts or follower lists.

Location
Nearby gigs; location is never stored.

ETHICS

Three design decisions

Location stays private
Nearby uses location only in the moment.

Fans choose visibility
Names are shared only with their chosen artist.

Curators apply
The team reads the reason before approval.

THE DAILY RHYTHM

A day in Folio

Midnight
The last Edition locks for the city.

Morning
A new Edition opens, curator named.

Read, then done
8–12 sourced picks. No endless feed.

OUR PROCESS

The change from MOTIF to Folio is the story.

01	02	03	04	05	06	07
MOTIF	**Interviews**	**Week 9**	**Music pivot**	**Folio build**	**Shared DB**	**Present Product**
First concept	Six interviews	Feedback	MOTIF → Folio	Edition + roles	Demo → live	Show Folio
